

**Galina-Agrofreeze**®

F r u i t s & V e g e t a b l e s

## *Company profile*

Galina–Agrofreeze is specialized in the plantation, processing and production of Vegetables and Fruits. In the most modern state-of-the-art processing plant we deliver our promise to our partners worldwide. Providing our partners with the highest quality product in the right time all year round is our profession. The company is fully dedicated to the export market with 100% of the production volume for the export market.

Our location in Egypt which is known for its moderate weather and rich Soil has given us the advantage of providing our Partners with quality products when it is not present in other parts of world.

Due to our quality products, services and competitive prices, Galina-Agrofreeze has managed to be main supplier for the most prominent names in the industry, national as well as multinational companies. Whether it's Jam and fruit yogurt producers, frozen vegetables re-packers, traders and fresh markets whole sellers, Galina is a name many industries and partners rely on. With the aid of the most strict quality control measures, HACCP systems, Euro gap and dedicated team, Galina has managed to be present in Europe, USA, Canada and Australia, and with the presence of our 3,000 tons cold stores capacity we are able to provide our customers with their needs in the right time all year round.

Galina envisions reaching out to our partners world wide with the finest quality food products that meets their needs, we work to continually exceeds our client expectation through the favorable combination of product, price and on time delivery.

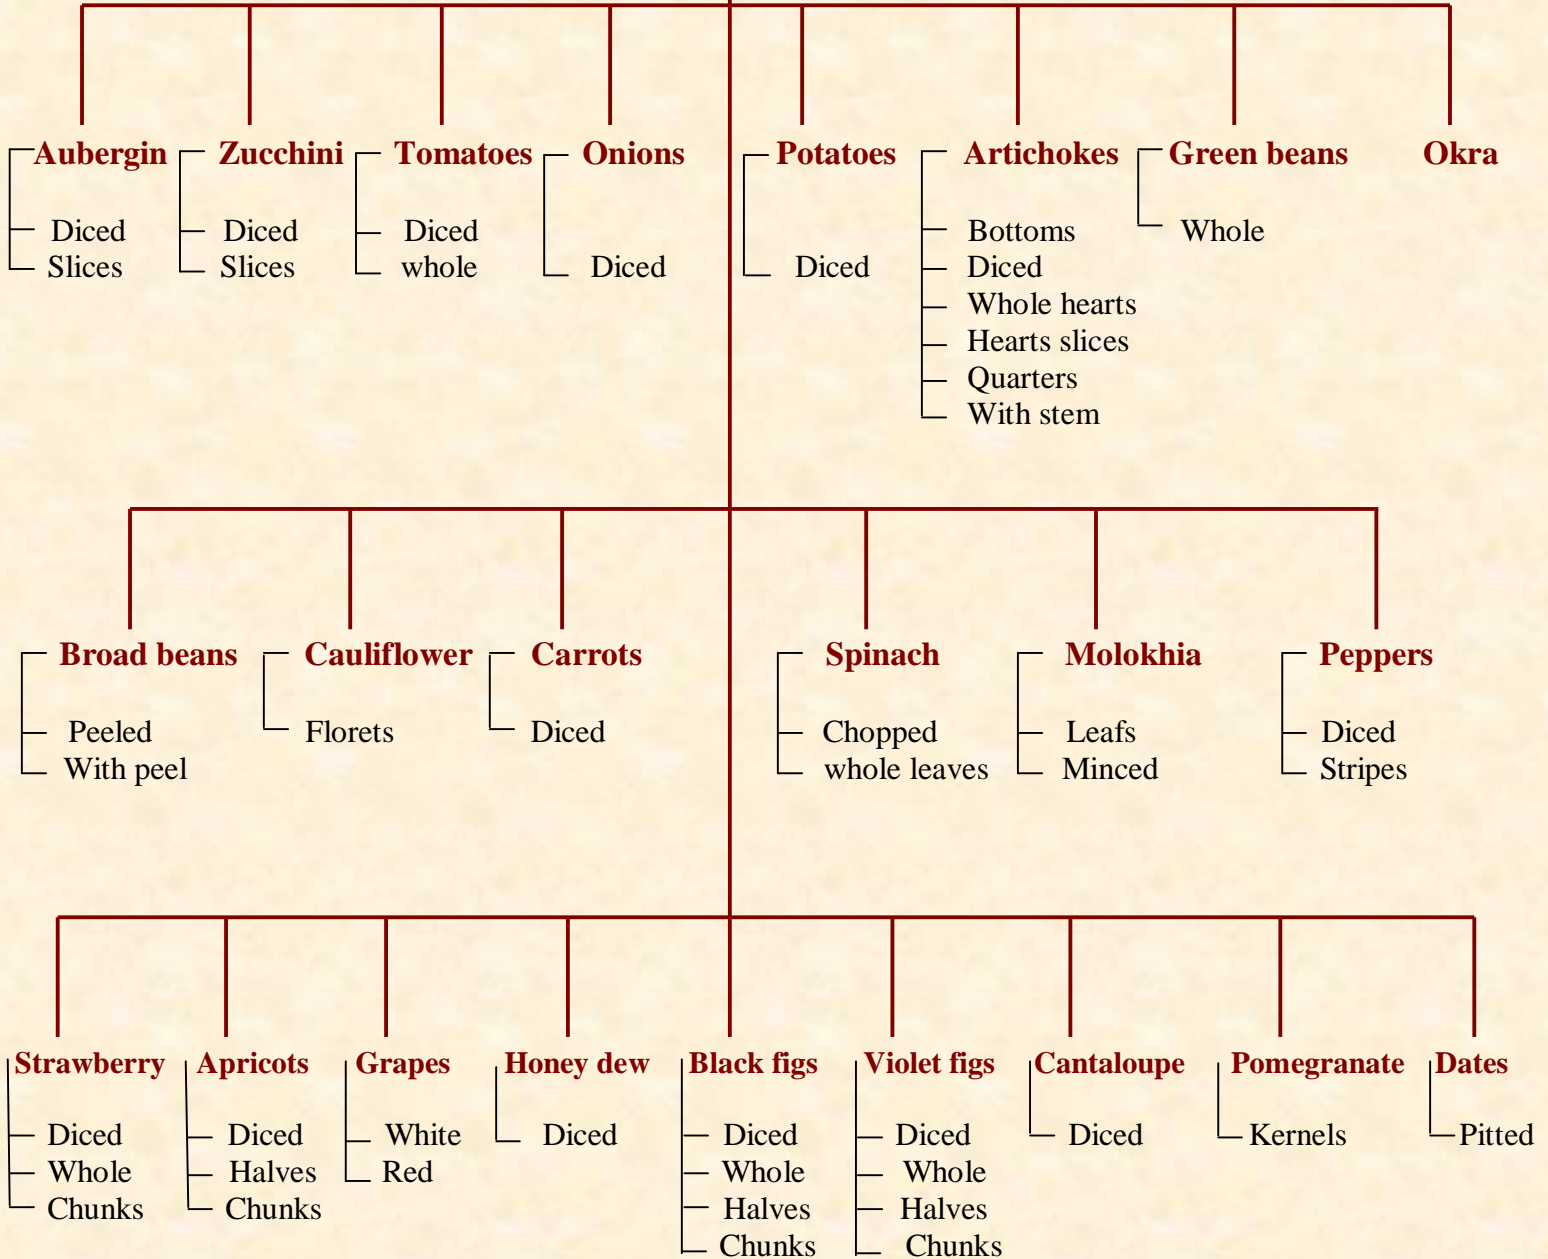

## *Our vision*

To be the leader producer & exporter of differentiated food products in the region

## *Our mission*

We are committed to provide superior value products to our partners worldwide

# PRODUCT TREE

# Fruits

Cantaloupe diced

Green figs

Among our fruit menu, strawberry stands as one of Galina's main products we specialize in, with 3,000 tons annual production we are a leader producer and exporter of strawberry in the region.

Our success story starts right from our farms by controlling the entire farming and harvest process that are immediately transported to the factory accordingly; we secure receiving the healthiest and finest quality raw-material possible.

Strawberry thereafter undergoes a series of quality inspections before and during processing. Through every stage our quality engineers are devoted to create a superior product by applying the latest techniques in the industry to preserve the strawberry's structural integrity.

Packed retail or bulk all our production passes through our metal detector device then loaded and shipped on time to our partners worldwide.

Whether you are considering the strawberry for jam, juice or dairy, for retail or catering, need it diced, chunks, or whole, we are a one stop shopping for all your needs and are committed to master the final product to meet your exact requirements.

# Apricot

Apricot is our specialty, in 2008 Galina delivered 1800 tons of frozen apricot to 5 continents,

It all starts with the raw material, Apricot requires cool weather to break dormancy and dry sunny weather for fruit maturity, this specific climatic requirements of the apricot is perfectly found in Egypt, that explains the special characteristic pleasant flavor for our apricots,

Entire apricot farms are managed by Galina, which allow us to harvest the crop at the best timing while the apricot is mature and firm.

By immediately transporting the raw material to the factory and Individual quick freezing it with no additives added, we guarantee that it will keep its characteristics for at least 48 months.

Similar rigid quality assurance steps are followed with apricot till the container loading.

If you use apricot for retail or as ingredient in your final product we invite you to experience our distinguished apricots.

# Frozen vegetables

8 angle okra

# Artichokes

You can't mention Artichokes without mentioning Galina,  
Frozen or brine, quarters or bottoms, with stem or whole hearts,  
We are the artichokes experts, we invested millions to stand at  
the top of artichokes industry...

## Frozen bottoms

Artichokes are originated and prepared from clean,  
sound crop. After harvest, the young, tender and  
healthy artichokes are sorted, and the bottoms are  
graded to several categories, 3-5, 5-7, and 7-9 cm.

## Quarters in brine

The young, tender and healthy artichokes  
without hard external leaves, well shut central  
leaves, not a lot violet leaves inside, completely  
edible and tender leaves, to be graded, left to  
oxidize and cut to the specific width of piece  
2-2.5cm and a specific height 4-5 cm.

## Whole Hearts in brine

Originated and prepared from best quality  
Artichokes, from the time of grading, peeling and  
cutting, we keep our artichokes in a light acidic  
medium to maintain its color and avoid oxidation,  
From time of receiving to the end product process  
does not exceed two hours span.

# Product List

## Frozen Vegetables

## *Facility*

Our facility is located in Alexandria - Egypt on an area of 25 thousand sq.mtrs equipped with the latest technology equipments, with the aid of five processing lines we produce a large variety of IQF frozen fruits and vegetables with a capacity reaching 24,000 tons per year and with this capacity increase we are in the process to open new markets. Our 3000 tons Cold storage facility are fully monitored with precise temperature and climate control allowing us to extend shelf life to provide the best product delivered to our customers.

Frozen products processing are done by aid of a fully automated line from cutting until freezing which is done by the use of the most technically advanced freezing IQF machine by fluidization to insure fast effective freezing and 100% of pieces to be loose free.

## *Total quality Management*

Our quality control starts from farms to final loading with the assistance of 35 highly trained quality control engineers.

Our quality assurance personals regularly visit suppliers' farms to assure that proper procedures are being followed and that the raw materials they supply meet Galina's rigid specifications.

Processing at every stage and packaging operation are continually checked, samples are collected at several steps through the production process and are evaluated utilizing the most sophisticated methods in the industry to assure the production of frozen products with consistent flavor, texture and nutrient content.

Galina's standards are even more stringent than those required by the government and our effective quality assurance system complies with international standards (ISO 9001, HACCP, BRC and FDA.)

*Galina Agrofreeze*
